13. Describe Proposed or Coompleted Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Plans are to TA the Dakota interval of this well by cementing a 50' plug above the Dakota perforations and then complete as a MV well, if the casing integrity test is successful. Brief details of the procedure we will using is as follows: *Set CIBP @ top of Dakota*

MIRU, ND WH & NU BOP. Kill well if needed. COOH w/production tubing. RIH & cement a 50' cement plug above the Dakota perforations. Then PT plug & casing at least 500 psi for 30 minutes. Log the well. Perforate the MV intervals, acidize and stimulate. Clean out to PBD. RIH w/tubing and then ND BOP, NU WH & return well to production as a MV single.
