13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Due to Phillips' work load and scheduling problems and the fact that this well is in the Big Game Closure area we were not able to complete the work planned for this well this year. Plans have also changed slightly, to running a cased log to evaluate the Dakota and the Mesaverde zones.

If the DK zones looks unproductive, then we will be TAing the Dakota interval of this well by cementing a 50' plug above the Dakota perforations and then completed this as a single MV recompleat as our previous sundry dated 5/11/01 stated. But if the DK looks as if there is potential, we will then try to restimulate the Dakota and then complete the MV interval as indicated on previous sundry and we will then file paperwork to commingle the DK/MV zones. All of this of course is contingent on this well passing the casing integrity test to be performed at the time of workover. Plans are to have this work started by August 1, 2002. We wish to use the C102 for the MV dedication that was attached to the 5/11/01 sundry.

14. I hereby certify that the foregoing is true and correct.
