We are currently attempting and have been attempting for some time to obtain ROW to connect the subject well. We have had difficulty in negotiating ROW with one land owner. We do have ROW provisions under our lease agreement and we plan to exercise that provision to enable Amoco to connect the well.

We request an extension of the long term shut-in period to enable Amoco to complete the connection of this well. Since we do not plan for this well to remain shut-in, we also request that the requirement to test the casing integrity be waived for a short time. We anticipate it will take three months to complete the connection of this well. If you have any questions, please contact Brent Miller at (303) 830-4049.
