Section 19, T29N, R6W, Rio Arriba County, NM

Description of workover procedure used to increase production of the subject well:

The location was debottlenecked, meaning we replaced small lines and equipment with larger lines and equipment to eliminate flow restrictions between wellhead and meter-run.

7. Taking existing surface equipment off:
8. Replaced old equipment with bigger equipment, (i.e... bigger separator and flow lines).

Work began approx. 7/9/2001 and was completed 7/11/2001.
