*Administrative Order NSL-2962*

Dear Mr. Sanders:

Reference is made to your application dated December 7, 1990 for a non-standard coal gas well location for your San Juan 29-6 Unit Well No. 259 to be located 1304 feet from the North line and 2401 feet from the East line (Unit B) of Section 9, Township 29 North, Range 6 West, NMPM, Basin Fruitland Coal (Gas) Pool, Rio Arriba County, New Mexico. The E/2 of said Section 9 shall be dedicated to the well forming a standard 320-acre gas spacing and proration unit for said pool.

By the authority granted me under the provisions of Rule 8 of the Special Rules and Regulations for the Basin-Fruitland Coal (Gas) Pool as promulgated by Division Order No. R-8768, the above-described unorthodox coal gas well location is hereby approved.

Sincerely,

William J. LeMay  
Director

P. O. Box 2088  
Santa Fe, New Mexico 87504-2088

Attention: William J. LeMay, Director

Gentlemen:

Phillips Petroleum Company respectfully requests administrative approval to drill the subject well at an unorthodox location due to a request from Mr. Selso Gomez, surface landowner. Mr. Gomez requested Phillips to move the originally staked and permitted location to a location which will be unorthodox for a east-half proration unit. The original location is in an area which is an extremely good grassland that Mr. Gomez uses in his ranching operations. By moving the well to the proposed location, there will be less damage to the grassland. The proposed location will offset an existing well pad and access road. Please note, the proposed location would be standard for a north-half spacing/proration unit. Due to the San Juan 29-6 Unit operating agreement, we must use east-half, west-half units.

Attached for your use in granting administrative approval is:

1. Form C-101, Application to Drill and C-102, Well Location and Acreage Dedication Plat. Approved May 23, 1990.
2. Form C-103, Sundry Notice and C-102, Well Location and Dedication Plat requesting approval to move the location.
3. A portion of the Fourmile Canyon Quadrangle topo map showing Section 9.

Phillips Petroleum Company is the operator of the entire San Juan 29-6 Unit area concerning the Fruitland Coalseam development and the only offsetting operator to the proration Unit for Well No. 259. The proposed location will twin the existing Well No. 64 location and use the existing access road during construction and drilling operations.
