Extended Dakota Production Forecast
On the San Juan 29-6 Unit #31B
Unit E, 1330' FNL & 125' FWL, Sec. 10 T29N R6W
API # - 30-039-26197

Dar Mr. Hayden:

Over a year ago we submitted a Dakota Forecast on this well good through February 2001. We didn't commingle the well until 12/1/00, therefore more forecast data is needed to have our paperwork coincide. Phillips still plans on using the subtraction method for this well for approximately twelve months starting with December 2000. After the 12th month period we will convert to the ratio method as indicated in our commingling application.

Dakota Production Forecast

December 2000	3,121	January 2001	3,001
February 2001	3,082	March 2001	3,062
April 2001	3,042	May 2001	3,023
June 2001	3,003	July 2001	2,984
August 2001	2,965	September 2001	2,946
October 2001	2,927	November 2001	2,909

If you have any questions, please call me at 505-599-3423.

Sincerely,

PHILLIPS PETROLEUM COMPANY
