13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was staked approx. 20' south of an orthodox location and at the time of staking it was felt that the spacing order for Dakota would be changed as the Mesaverde was. Since this hasn't happened to date, we need to change this location to fit a orthodox location (20' north). Attached are the new C102's and the cut an fill for the new location.
