1. The first step in the process of the investigation is the identification of the subject. This is done by the use of the subject's name, address, and other identifying information. The subject is then located and interviewed. The interview is conducted in a confidential manner and the subject is assured that their information will be kept confidential. The subject is then asked to provide information about their activities and contacts. This information is then used to identify other individuals who may be involved in the investigation. The process continues until all individuals involved in the investigation have been identified and interviewed. The final step in the process is the preparation of a report. This report contains all the information gathered during the investigation and is used to inform the appropriate authorities. The report is then filed and the investigation is closed.

1. What is the purpose of the study? The purpose of the study is to investigate the effect of a new teaching method on student performance.

THE UNIVERSITY OF CHICAGO

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$. It is shown that the solutions of the system (1) converge to the solutions of the system (2) in the sense of the weak convergence in the space $L^2(\Omega; \mathbb{R}^n)$.
