DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

This well has reached a total depth of **2085'**, and in our opinion is barren of oil or gas production. Having received verbal clearance from the District Engineer we propose to abandon the hole and will plug it as follows:

Cement plug **1550'** to **1700'**
Cement plug **600'** to **700'**
10 sacks of cement at surface with marker

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
