The elevation of the ~~surface~~ ^{ground} above sea level is 5444 ft. ~~Its~~ ^{Its} elevation will be furnished later.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Original "Notice of Intention to Drill" dated March 13, 1964, showed a 4,950' Dakota test.

It is now proposed to drill the well to the lesser depth of 4,300' - a Gallup test.

The proposed casing program is:

250' - 9-5/8" OD Surface Casing - Cemented to surface.
4,300' - 4-1/2" OD Production String - Cemented with sufficient cement to meet conditions encountered.

One core is contemplated. Estimated spud date is March 21, 1964.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
