#49 SAN JUAN 29-7 UNIT
Well No. 1 is located 790 ft. from N line and 850 ft. from E line of sec. 20
NE 1/4 - Section 20 29-N 7-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blanco Rio Arriba County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft. To be determined.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The objective sands are the Cliff House and Point Lookout expected at about 4600' and 5200' respectively.

Proposed casing program:

200' - 10-3/4" casing cemented to surface
3300' - 7-5/8" casing cemented with 150 sx.
5400' - 5-1/2" casing cemented with 300 sx.

We propose to drill with Rotary Tool employing mud through the Pictured Cliffs and gas drill to total depth. Well will be sand fraced to stimulate production.

The E 1/2 of Section 20 is to be dedicated to this well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
