NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I-28-29N-7W

I, Gary W. Brink, being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:

That I am employed by El Paso Natural Gas Company in the capacity of
Petroleum Engineer, that on July 17th, 19 80

I personally supervised the setting of a Baker Model G-22 Locator Seal Assembly

in EPNG, San Juan 29-7 Unit,
Operator of well *Make & type of packer*

Well no. 40A (MD) located in the Blanco Mesa Verde & Basin Dakota field,
Lease name
Rio Arriba county, state of New Mexico, at a subsurface depth of

6240' feet, said depth measurement having been furnished me by
Pipe Record

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Gary W. Brink
