Re: San Juan 28-7 Unit #91 B-24-28N-7W
San Juan 29-7 Unit #44-A I-17-29N-7W
Warren #4 H-14-28N-9W

Dear Eddie:

The enclosed packer tests on the referenced wells were inconclusive in proving zone separation.

Please reschedule and retest the wells in such a manner as to prove separation. Shut both zones in for a minimum of 3 days and blow the higher pressured zone to the atmosphere for as long as it takes to get a significant pressure drop. Please advise this office at least 24 hours prior to the tests so we may provide a witness.

If you have any questions, please contact this office.

Yours truly,

Charles Gholson
Deputy Oil & Gas Inspector
