NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, Richard Smiley, being of lawful age and having full
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by El Paso Natural Gas Company in the capacity of
Petroleum Engineer, that on June 13th, 1981

I personally supervised the setting of a Baker Model G-22 Locator Seal Assembly
Make & type of packer

in EPNG, San Juan 29-7 Unit,
Operator of well Lease name

Well no. 111M located in the Blanco MV & Basin Dakota field,

San Juan county, state of New Mexico, at a subsurface depth of

5615' feet, said depth measurement having been furnished me by

Pipe Record;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Richard F. Smiley
