13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The subject well was previously approved for plug and abandonment on August 7, 2000. A Sundry request was filed on 05/09/2001 requesting permission to delay the plug and abandonment pending an attempt to restore the well to production within the 3rd Qtr of 2001. The proposed activity was not initiated within that time frame and a Sundry request was submitted on 01/02/2002 requesting additional time to further evaluate and attempt production restoration. The result of that evaluation and review indicates that there is no future recovery potential for the subject well, therefore, a decision has been made to proceed with permanent plug and abandonment of the well in lieu of temporary abandonment as per discussion with Steve Mason (BLM) on 04/29/2002. We respectfully request permission to plug and abandon the subject well as per approval granted on 08/07/2000. The subject well has been placed on our plug and abandonment rig schedule for plugging, however, due to wells previously scheduled for plug and abandonment we anticipate that the plugging of the subject well to begin on or prior to 07/05/2002. This date is dependent on
