RE: UN-NETTED PITS AT THE FLORANCE 30-A E-01-29N-08W

Dear Buddy,

I visited the referenced well on June 8, 1994 and found a 1" skim of oil and approximately 15 BBLS of water in the pit to which the compressor and high side of the separator dump. There was also about 1/2 BBL of oil in the tank drain pit. Please bring the pits into compliance ASAP. C-134s have been filed for both pits. Let me know when you have finished.

Yours truly
