

NEW MEXICO OIL CONSERVATION COMMISSION

PACKER SETTING REPORT

I, Loren W. Fothergill, being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:

That I am employed by El Paso Natural Gas Company in the capacity of
Petroleum Engineer, that on September 12, 1977

I personally supervised the setting of a Baker Model D Packer
Make & type of packer
in El Paso Natural Gas Company, Vanderwart A,
Operator of well Packer name

Well no. 5A located in the Blanco P.C. Ext. - Blanco M.V. field,
San Juan county, state of New Mexico, at a subsurface depth of
3932' feet, said depth measurement having been furnished me by
Wireline Measurement;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
