(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Farmington, New Mexico June 11, 1953
 Well No. 1 is located 1420 ft. from S line and 1500 ft. from W line of sec. 13
SW 1/4 of Section 13 1-29-N R-9-W NM
 (Sec. and Sec. No.) (Twp.) (Range) (Meridian)
El Estero San Juan New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. (To be reported later.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 5200 feet. Rotary tools will be used to total depth. Casing will be set on top of Cliffhouse. Brownstone formation will be drilled with gas and cleaned out with gas after shot with 225.

The following casing program is proposed:

Size	Depth	Weight	Remarks
9-5/8"	200'	225	17% of calculated amount to circulate.
7"	4200'	300	150% of calculated amount to fill 1260' above shoe.

Copies of location plate are attached. A copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may commence.
