DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On July 28, 1951, 7" casing was landed at 4160 feet with 125 sacks cement. Plug down at 12:44 P.M., July 28, 1951. Temperature survey indicated top of cement outside of pipe at 3490'. At 11:00 P.M., July 31, 1951, casing and water shut-off were tested at 1200 pounds pump pressure for 30 minutes. No drop in pressure resulted. Forty-three feet of solid cement were drilled in bottom of pipe and water shut-off was again tested at 1200 pounds for 30 minutes. No drop in pressure during this test. Drilling operations were resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
