17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The subject well is producing in a logged off condition and all attempts to unload the well are short term and inefficient. Therefore, we plan to pull and lay down the 2-3/8" tubing and run 1-1/4" tubing in order to have more efficient fluid lift.

Average production for the month of February was 159 MCFD and a yield of 16.7 BC/MMCF.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
