Farmington, New Mexico, June 20, 1951

Well No. A-1 is located 990 ft. from N line and 990 ft. from E line of sec. 11
NE/4 of Section 11 T-29-N R-9-W NMPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blanco (Largo) San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6313 ft. (G.L.)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to approximately 5500 feet. Rotary tools will be used to total depth. Casing will be set on top of Cliffhouse. Mesa Verde formation will be shot with SNG and cleaned out with reverse rotary rig. The following casing program is proposed:

Size	Depth	Cement	Remarks
9-5/8"	450	420	175% of calculated amount to circulate
7"	4500	125	100% of calculated amount to fill 900' above shoe

Tentative plans are to place a 1000 foot 5" OD uncemented liner through pay. Copies of location and elevation plats are attached. Also attached are detailed staking plats. A Copy of any survey taken will be submitted upon completion of well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
