NOTICE OF INTENTION TO ABANDON WELL		

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

September 15, 1958

Well No. 28 is located 1700 ft. from N line and 890 ft. from E line of sec. 31
NE 1/4 Sec. 31 30N 4W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blanco M. V. Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 7583 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

9-14-58 Total depth 7003'.
Ran 76 joints 5 1/2", 15.5#, J-55 casing (2479') set from 4523'
to 7002' with 125 sacks regular cement, 125 sacks Portland, 125 Gal,
followed by 50 sacks regular cement.
Held 1000# for 30 minutes.

Top of cement by temperature survey at 5160'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title Petroleum Engineer

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The second step is to gather relevant information and data. This may involve research, consultation with experts, or collecting data from various sources.

3. The third step is to analyze the information and data collected. This involves identifying patterns, trends, and relationships that can help in solving the problem.

4. The fourth step is to develop a solution or answer based on the analysis. This may involve applying theoretical knowledge, using logical reasoning, or conducting experiments.

5. The fifth step is to verify the solution or answer. This involves checking the results against the original problem and ensuring that the solution is valid and reliable.

6. The sixth step is to communicate the solution or answer. This involves presenting the findings in a clear and concise manner, using appropriate language and visual aids.

7. The seventh step is to reflect on the process and the results. This involves evaluating the effectiveness of the approach and identifying areas for improvement.

8. The eighth step is to document the process and the results. This involves creating a record of the work done, including the data, the analysis, and the solution.
