Rio Arriba
(County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 7563 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to drill a well with rotary tools thru the Mesa Verde formation. Mud circulation will be used thru the Pictured Cliffs and set intermediate casing. Gas circulation will be used thru the Mesa Verde and production liner will be set. Possible productive intervals will be perforated and fractured. Est. T. D. 6830'.

Casing Program:

10 3/4" at 170' with 150 sacks cement circulated to the surface.
7 5/8" at 4191' with 250 sacks cement.
5 1/2" liner at 4150-6830' with 300 sacks cement.

The E/2 of Section 31 is dedicated to this well.
E/2: SF 079488

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
