(other) Plug & Abandon gas zones and recomplete as a water well in the existing well.

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was temporarily abandoned on April 11, 1969 in the following manner:

A cement retainer was set at 5365' and the open hole was cemented with 175 sks. of cement. PBTD 5340'. Perf'd 2 squeeze holes at 2935', set cement retainer at 2385' and squeezed with 200 sks. cement. The Ojo Alamo is covered inside the outside the casing.

It is planned to perforate holes at 1800' and circulate cement to the surface. If circulation cannot be established, several block squeezes will be done at different intervals (1800', 1375', and 600') to isolate the water sands. The well will be cleaned out and

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

and perforated and a Reda pump out on tubing.
The Water well will be governed per Bureau of
Land Management special use permit.
A reserve pit 150' x 150' x 15' deep will be
dug on the existing drilling tract.
