Let us know if this well
has been permanently plugg-
ed. If we should carry it get-
ting temporarily abandoned, should
the response be changed to
Sanguon 30-a Unit? Thanks

This well was temporarily
abandoned in 1962 with a
cement plug placed across the
pay - If they ever re-enter
it we will change it
to a Sanguon Unit well.
In the meantime carry it
as it is - as a TA
well it will not appear
in our production publications
