Mr. E. C. Arnold  
Oil Conservation Commission  
Aztec, New Mexico

Dear Mr. Arnold:

I have just been informed that the flow chart for the El Paso Natural Gas Company McCulley No. 2-A is not a good chart for testing purposes. We desire to shut this well in and change the orifice plate in the meter run in order to obtain a better chart for the "Initial Production Test." To shut this well in now would cause the test chart to be from December 8 to 16. This well was tied in on November 2, 1955 and the original 45 day due date would be December 17, 1955.

Would you please grant us an extension on the delinquent date to December 31st, which would allow us time to compile and calculate the test?

Very truly yours,

*H. L. Kendrick*
