(other) Reentry of previously plugged well

SUBSEQUENT REPORT OF

(NOT SURVEY) Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This well was plugged and abandoned in 1953 and the plugging was approved by the U.S.G.S. at that time. It is now suspected of leaking gas into Navajo lake as evidenced by gas bubbles forming in the lake adjacent to the wellsite. As requested by Minerals Management Service, we intend to reenter the well and squeeze cement the casing cuts at 2300' and 2000' with sufficient volume to prevent gas communication to the open formation. This work should commence during the second quarter of 1983.
