July 21, 1959

Well No. 28-23 MD is located 1013 ft. from N line and 1110 ft. from E line of sec. 23

NE Section 23 30N 5W N. M. P. M.
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Blanco MY & Wildcat Dak Rio Arriba
(Field) (County or Subdivision)

New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is 6747 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to plug this well because of excessive horizontal deviation of hole too near surface.

The work will be carried out in the following manner:

1. A cement plug consisting of 50 sacks regular cement will be spotted in 13 3/8" surface casing from 0-30'.
2. A 4' x 4" pipe will be left as permanent marker.
3. Surface casing will be left intact and hole will be left full of drilling mud.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
