## REVISED

Gentlemen:

Attached is a copy of the allocation for the recompletion of the subject well that was completed 7-30-01. DHC-202az was issued for this well.

Gas: Mesaverde 51%  
Dakota 49%

Oil: Mesaverde 0%  
Dakota 100%

These percentages were calculated using rate-time reserve estimate comparisons for each respective formation. Because the condensate production did not change with the addition of the Mesaverde formation, the oil allocation has remained completely to the Dakota formation.

Please let me know if you have any questions.

Sincerely,

Peggy Cole  
Regulatory Supervisor
