☐ Altering Casing
☒ Other - Long term shut-in

☐ Change of Plans
☐ New Construction
☐ Non-Routine Fracturing
☐ Water Shut off
☐ Conversion to Injection

13. Describe Proposed or Completed Operations

After further evaluation, it has been determined that this well will be unable to produce against line pressure economically. Line pressure is currently at 380 psi. Adding additional pay is being evaluated to make this well economic and the line pressure problem is being addressed. Records show a good primary cement job and surface pressures do not currently show a casing leak so there should be no environmental hazards.
