13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this zone.)

Mallon Oil Company would like to request a one year extension for Shut-In status for the above referenced well. The reason for the request is due to the existing 2" pipeline which has too much restriction to allow flow rate from this well at a lower pressure. However, as the field develops to the East we will change out the pipeline from the 2" line to the 4" line and will allow the well to produce.

The well is capable of producing at a lower line pressure.
