13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The NEBU #403 has been designated as a pressure observation well. The well is currently shut in waiting on a workover unit to remove a string of 3/4" rods and an insert pump. The wellhead will be striped down to a master valve and test adaptor. A pressure bomb will be periodically run across the Fruitland perforations to monitor formation pressure as adjacent Fruitland wells are produced.

The designated proration unit for the NEBU #403 has been replaced by the NEBU #403R (redrill).

14. I hereby certify that the foregoing is true and correct.
