13. Describe Proposed or Completed Operations

It is intended to workover the well in the following manner:

Pull the 3 1/2" tubing. Pull the 5 1/2" liner. Cavitare the Fruitland Coal formation utilizing natural and air assisted surges until the well stabilizes. Clean the well to TD and run a 5-1/2", 15.5#, K-55 casing liner. The liner will be pre-perforated 4 spf across the coal intervals. Production tubing will be 3 1/2", 9.3#, J-55. The well will then be returned to production.

14. I hereby certify that the foregoing is true and correct.
