**13. Describe Proposed or Completed Operations**

It is intended to workover the subject well in the following manner:

Pull the tubing. Pull the 5-1/2" liner. Cavitare the Fruitland Coal formation utilizing natural air and assisted surges until the well stabilizes. Clean the well to total depth and run a 5-1/2" casing liner. The liner will be pre-perforated 4 SPF across the coal intervals. Re-run the production tubing. The well will then be returned to production.
