13. Describe Proposed or Completed Operations

It is intended to hydraulically jet blast four 300' laterals in the subject well in the following manner:

Scrape the tubing and casing, pull the tubing. Trip in the hole orienting the aiming boot on the bottom of tubing, drill a 1/2" to 3/4" hole in the 5 1/2" liner. Run in the hole with the high pressure jetting hose and hydraulically jet a 300' lateral in the coal. We will attempt to jet 4 laterals in the coal, rerun the production tubing and return the well to production. The production will be monitored until recavitating the well as per the sundry notice approved 1-22-98 by the BLM.
