Continued from page 1

The casing procedure was changed from original APD, because a nature fractured formation was encountered during drilling and well began to flow gas and water. The hole became unstable and 5-1/2" casing would not go below 6282'. Decided to cement the 5-1/2" casing to save the Mesaverde Formation. An attempt will be made to drill back down through the Dakota formation TD @ 7920'. If successful, will run 4" liner to TD. Louis Robinson received verbal approval from Mr. Errol Becher (BLM) on 6/29/95.
