13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In June 1998 a progressive cavity pump (rotor and stator) was installed on subject well to help lift water. In September the pump stopped working. In an attempt to get the PCP repaired, the rods corkscrewed inside the well. Fished for approx. 1 month. We were unable to recover all of the fish before the wildlife restriction date, so we stopped and RIH w/tubing and landed @ 3116' (above fish). NU WH & pumping tee. RIH w/2" X 1.025" X 8 X 10 X 13 insert pump w/10' gas anchor on 122 (.875") sucker rods. RD & MO Rig. Turned well over to production for the winter, will return in the spring & retrieve fish or sidetrack.
