13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

An insert pump and rods were installed on the subject well last December because Phillips wasn't successful in their attempt to fish an inoperable PCP and rods from the well before the BLMs wildlife restriction date. Since the restriction dates are now over, plans are to now remove sucker rods and insert pump, pull 2-3/8" tubing. Then RIH & mill rods inside hanger and mill out liner hanger. RIH w/spear and grapple, engage liner and pull same. Cleanout wellbore. Underreamed open hole interval to TD and clean out to TD. Run 5-1/2" liner and perforate. Rerun 2-3/8" tubing and return well to production.
