Attention: Mr. Gary W. Brink

*Carson No. 6  
API No. 30-039-26145  
Unit M, Section 29, Township 30 North, Range 4 West, NMPM,  
Rio Arriba County, New Mexico.  
East Blanco-Pictured Cliffs (Gas – 72400) and  
Blanco-Mesaverde (Prorated Gas – 72319) Pools*

Dear Mr. Brink:

Reference is made to your recent application for an exception to Rule 303.A. of the Division Rules and Regulations to permit the above-described well to commingle production from the subject pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated gas pool as printed in the Division's San Juan Basin Gas Proration Schedule.

The applicant shall consult with the supervisor of the Division's Aztec District Office upon completion and testing of the well in order to determine a fixed allocation of production from each of the commingled zones. Upon approval by the Division's Aztec District Office, the applicant shall provide the approved allocation formula to the Division's Santa Fe Office.
