RE: REQUEST FOR ADMINISTRATIVE APPROVAL OF UNORTHODOX WELL LOCATION
SAN JUAN 30-5 UNIT #266 WELL
W/2 SECTION 10-30N-5W
RIO ARRIBA COUNTY, NEW MEXICO
PHILLIPS CONTRACT C40454

Ladies and Gentlemen:

Phillips Petroleum Company (Phillips) as Operator of the captioned well, respectfully requests administrative approval of an unorthodox location for this well.

Phillips proposes to drill the San Juan 30-5 Unit #266 well at a location of 665' FSL & 670' FWL of Section 10-30N-5W, Rio Arriba County, New Mexico. This well will be a Fruitland Coal in the Basin Fruitland Coal Pool with the W/2 of Section 10 designated as the drillblock.

This request for an unorthodox location is being made due to the rugged topography of the SW/4 of Section 10. An orthodox location would require extensive excavation into a steep grade on the side of a mesa for location construction and pipeline/road construction. As you are aware, the BLM has become increasingly concerned with surface disturbance and erosion consideration in the San Juan Basin. An effort to locate this well at an orthodox location was made, but as is evidenced by the accompanying topographical plat, this is not possible to do and still satisfy the BLM.

For your benefit in reviewing this request, we are providing the following:

1. Form C-102
2. A topographical plat (with orthodox location windows penciled in)
3. A nine section plat exhibiting offset operations.

This drillblock is located within the confines of the San Juan 30-5 Unit. The offset operators have been furnished with three (3) copies of this correspondence by certified mail and are requested to furnish your office with a Waiver of Objections, keep one copy for their records and return one copy to our office.

We thank you for your considerate attention to this request. Should you need additional information or clarification, please do not hesitate to contact the undersigned.

Very truly yours,

S. Scott Prather, CPL

IN REPLY REFER TO:

3162.5-1 (07200) *RMK 1/11/00*

Mr. Richard Allred
Phillips Petroleum Company
5525 Highway 64, NBU 3004
Farmington, NM 87401

Dear Mr. Allred:

The purpose of this letter is to inform Phillips Petroleum Company and NMOCD of two unorthodox well placement locations for the Phillips Petroleum Company's San Juan 30-5 # 265 and 266. These wells were staked in orthodox locations, but it was the Bureau of Land Management inspector who advised Phillips to move these wells to the now staked unorthodox locations. In the past, most locations without resource conflicts have been drilled. The windows where the wells would not require an OCD hearing have topographical constraints, is in critical big game winter range, impacts archeological resources and is a major concern to the Bureau of Reclamation because of watershed degradation and erosion. This caused the moving of these wells to the location where they are now staked. It is the Bureau of Land Management's goal to approve all wells in an area where resource damage is minimal and can be reduced to acceptable levels by mitigation. Therefore, it is the request of the Authorized Officer that these locations be moved to unorthodox locations to lessen impacts to various resources in the area.

If you have any questions, please contact Bill Liess of my staff at (505) 599-6321.

Sincerely,

Ruben Sanchez
