The elevation of the derrick floor above sea level is 6752 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Due to non-commercial production this well will be plugged & abandoned in the following manner:

1. Spot a 740' cement plug from 6290-5550' to cover open hole 6290-5635'.
2. Determine 7" casing free point and cut casing.
3. Spot a 100' cement plug across cut off. Pull casing.
4. Spot a 21' cement plug with a 4" x 4' permanent type dry hole marker in top of surface pipe.
5. Clean location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
