The elevation of the derrick floor above sea level is 6224 ft.

DETAILS OF WORK

(These entries of work reported depths to objective points, their sizes, weights, and lengths of proposed casing, and other matters relating to the work, and all other matters relating to the work.)

The well has been plugged from top to bottom with 1200 sacks of cement. A regulation marker has been installed. The collar site and surrounding area have been cleaned up.

I understand that this plan of work must comply with the regulations of the Bureau before operations may be commenced.
