Denver 2, Colorado

Attn: Mr. Paul Messinger

Dear Sir:

We have received your letter of April 18, 1960 regarding the acreage dedication for your #1 Navajo-Amarillo well in the SW $\frac{1}{4}$ Section 31-29N-14W. We are enclosing a supply of Form C-128. Will you please re-submit this plat showing your acreage dedication as being either the South half or the West half of Section 31 and answer all questions regarding ownership and communitization. If your communitization has not been finalized, list the other acreage owners at the top of the page.

I also note that this well is not a standard Dakota gas well location. Dakota spacing rules require that gas wells be located a minimum of 790 feet from the unit boundaries. It is possible to secure administrative exception to this rule if the unorthodox location was necessary for topographic reasons; otherwise it will be necessary that a hearing be called before the Commission to secure approval of the unorthodox location prior to the time that the well is produced. In the event that you have not already spudded this well I would suggest that the well be moved so that it is at least 790 feet from the South and West lines of Section 31.

If we can be of any further service in this matter, please contact us.

Yours very truly

ECA:ks

Emery C. Arnold

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 200 million to 400 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion.

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. The investigator must first determine the nature of the problem and the scope of the investigation. This is done by interviewing the witnesses and the parties involved in the case. The investigator must also determine the time and place of the incident and the persons involved. This information is then used to develop a plan of investigation.

[illegible]

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971).

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.2 billion, from 1.1 billion in 1990 to 2.3 billion in 2010. The number of people aged 15 and over is expected to increase by 1.1 billion, from 3.9 billion in 1990 to 5.0 billion in 2010. The total population of the world is expected to increase by 2.3 billion, from 5.0 billion in 1990 to 7.3 billion in 2010. The population of the world is expected to increase by 2.3 billion, from 5.0 billion in 1990 to 7.3 billion in 2010.

Aztec, New Mexico

Attention: Mr. Emery C. Arnold

Dear Sir:

With reference to your letter of April 15, 1960, concerning our captioned test, please be advised that we have acted on your suggestion to explore the possibility of trading acreage so that a governmental half-section would be dedicated in the event our test was to result in gas production. The farmout company, The Atlantic Refining Company, has informed us that they would be agreeable, in the event of gas production, to re-dedicate the acreage as either the S/2 of Section 31 or the N/2 of Section 31.

We trust this will answer your letter and if there are any further questions regarding this matter, please contact me.

Thank you for your cooperation.

Yours very truly,

DAVIS OIL COMPANY
