17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Consolidated requests permission to commingle production from the Pictured Cliff and Fruitland formations if production is established from the Fruitland during re-completion operations. Royalty and working interest owners are the same for both zones. The proposed method to allocate production is to establish a probable producing rate for the Pictured Cliff to the New Mexico Oil Conservation Commission's satisfaction and to credit all excess production to the Fruitland formation.

18. I hereby certify that the foregoing is true and correct
