DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The objective sand is the Pictured Cliffs. The top is expected at about 1800'.
The producing string will be 3 1/2" O.D. casing, which will be cemented.
Approximate casing program:
100' of 8-5/8" O.D. cemented
1800' of 3 1/2" O.D. cemented with about 100 sacks

Well will be drilled with rotary tools to top of Pictured Cliffs sand, 5 1/2" O.D. casing set and well drilled into pay zone with cable tools. The well will then be shot with approximately 150 quarts of nitro glycerine.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
