Simmons "D"

Farminston, New Mexico October 8, 1963

Well No. 1 is located 1190 ft. from S line and 1090 ft. from W line of sec. 34

SW/4 SW/4 Section 34 T-29N R-9W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Blanco Masaverde San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5807 ft. (RUB)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As a result of the Simmons "D" No. 1 ceasing to produce, we propose to abandon the well as follows:

1. Pump 200 sacks cement down casing to fill open hole section 3776 to 4672. Top of cement will be left at about 3700.
2. Fill 7" casing with heavy fluid.
3. Spot 5 sacks cement surface plug 0-24'.
4. Pump 50 sacks cement in 9-5/8" - 7" casing annulus (9-5/8" set at 150').
5. Erect abandonment marker and clean up location.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
