Attn: Mr. J. J. Velten
Division Civil Engineer

Re: Texaco Inc. #1 State of New Mexico Unit "D"
M-32-29N 10W

Dear Sir:

Our files indicate the following information has been filed on the above well: Notice of Intention to Drill dated May 11, 1959; Form C-103 on surface casing dated August 8, 1959; C-103 on production casing dated August 13, 1959; and an electric log dated August 12, 1959.

We have received scouting information that the above well has been completed as a gas well in the Fruitland and Pictured Cliffs gas zones with the pay section extending from 1740 to 1948 feet. If this information is correct and gas is being commingled in the well bore this constitutes an illegal completion.

Rule 1108 of the New Mexico Oil Commission Rules and Regulations requires that Form C-105, Well Record form be filed within 20 days after completion of any well showing all pertinent information regarding completion of the well. Will you please file six copies of Form C-105 with this office immediately.

If our information is correct that the well is completed in both Fruitland and Pictured Cliffs reservoirs you are also hereby directed to take immediate action to either separate the producing zones by means of a packer in order that it might be produced as a dually completed well, or in the alternative, squeeze off one or the other of the producing zones. If you need further advice regarding the above matter, please contact us.

Yours very truly
