

New Mexico
OIL CONSERVATION COMMISSION
Aztec, New Mexico

October 8, 1957

Ted M. White
Box 716
El Paso, Texas

Gentlemen:

A recent check of our records indicates that your Company is delinquent on the filing of forms on your El Gallow well located in Section 33-29N-13W. Our records indicate that Notice of Intention to Drill was filed on January 23, 1957. Subsequent Notices were filed when casing was run.

Will you please file a copy of the Federal Well Record on this well with this office indicating whether or not it is a producing well and if not whether or not it was plugged and abandoned.

Yours very truly

Emery C. Arnold

...

Dear Sir:

I am very pleased to hear from you and to learn that you are interested in the work of the Oil Conservation Commission. The Commission is a non-profit organization which is dedicated to the conservation of the oil resources of the State of New Mexico. We are currently working on a number of projects which are designed to increase the efficiency of oil production and to reduce the waste of oil in the refining process.

One of our primary objectives is to develop and promote the use of oil-soluble detergents in the refining process. These detergents are designed to remove the impurities which are normally found in crude oil, and they are very effective in doing so. By using these detergents, we can increase the yield of refined oil and we can also reduce the amount of waste which is produced in the refining process.

Very truly yours,

Wm. H. ...
