DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth 1247 feet. Pictured Cliffs sand was squeezed w/200 sacks cement, 4 1/2" casing was shot off at 810 feet with 100 feet of cement put on stubb of pipe. Well was mudded to within 70 feet of bottom of surface pipe or to 273 feet and cemented with 50 sacks putting 30 feet cement up into the bottom of surface pipe. The surface was plugged with 10 sacks cement with bell marker. Well didn't make enough gas to produce.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
