DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to change plans as follows:

1. Not complete Dakota formation at this time as originally planned.
2. Set bridge plug and cement @ 5650 and complete in Gallup only.

Note: This Gallup production is estimated to be short lived. When Gallup is depleted we will again look at Dakota for possible completion in that formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
